SOLUTIONS FOR THE HEALTHCARE SECTOR TO WORK SAFELY AND PRECISELY

DISTRIBUTED ENDPOINTS AND WITH HETEROGENEOUS USES

A management console that allows you to differentiate the workstations in use and a tool (software or hardware) that helps managing the devices in the headquarter and remote offices without having to define any VPN.

DEVICES WITH SPECIAL CERTIFICATIONS

Hardware that allows you to work in security and with the best performance also guaranteed by the compliance with medical standards IEC 60601, CE MDD.

SECURITY UPDATES

A centralized management console that helps organize and automate all activities and updates remotely in just a few clicks.

SUPPORT FOR SPECIALIZED MEDICAL PERIPHERALS

Hardware that allow you to connect and support all the peripherals that the medical sector requires.

MULTI-DOMAIN MANAGEMENT

Integration with one or more Active Directory instances to automate the management of user lists (also centralized management of devices from associated entities, mergers, etc.).

SPEED OF ACCESS TO SYSTEMS AND IDENTIFICATION

Solutions that allow each user to access their resources in a secure, quick and personalized way, for example facilitated by the use of badges and readers.

MOBILITY OF WORKSTATIONS

Software that allow each user to access their resources regardless of the location, connectivity and hardware that allow mobility between departments.

ACCESSES AND PROFILES DIVERSIFICATION

Software that make it possible to differentiate the digital resources offered and the graphic interface based on the user who accesses and his needs.

MAXIMUM RELIABILITY AND STABILITY

Increased reliability with secondary server to always maintain service continuity and distribute loads.

MAXIMUM SECURITY AND PRIVACY

Centralized management console with controlled access levels and protected, controlled and manageable endpoints such as thin clients, software on workstations for differentiated authentication policies even with multiple factors.
