

6 REASONS TO IMPLEMENT WORKSTATIONS' MANAGEMENT WITH

ORGANISE YOUR INFRASTRUCTURE

The ability to view, **track and manage** all your workstations, as well as to organise them into **groups** constitutes an added value for the administrator.

SIMPLIFY UPDATES AND MAINTENANCE

Using a **centralised management** tool allows to guide all the activities on all devices **from a single point**, without physically go to the workstation to update.

IMPLEMENT MANAGEMENT AUTOMATION

Using a **scheduler** allows to manage each corporate device in an automated way with a consequent **saving of time** and the **convenience** of not having to think of all the operations.

SECURE ALL DEVICES

Any kind of tampering by the user or undesired operations can be **blocked** and prevented. Exclusive access to system parameters is **reserved for the administrator**, leaving the user only those resources configured for him.

OFFER REMOTE SUPPORT

Helpdesk operators can launch remote support sessions **directly from the console**, without the need for external tools, with a great **simplification** and time/cost **optimization** of the service.

REDUCE ENERGY WASTE

By using power management policies you can **reduce energy consumption** and thus avoid any unnecessary waste and improving further business **productivity**.

Reasons that result in:

Work for the administrator

Company savings
